Skills

- HTML and CSS
- JavaScript frameworks
- React and Next.js
- Tailwind CSS and Bootstrap
- Node.js and Express.js
- MongoDB database
- Version control with GitHub
- VS Code proficiency
- Framer Motion and Three.js
- Redux and Context API
- Webpack and Babel
- NPM package management
- ES6 features
- Mongoose ODM
- RESTful APIs
- State management strategies
- Routing techniques
- Hooks implementation
- Component development
- Flexbox and CSS grids
- Responsive web design

Intermediate (B1)

Certifications & Licences

- HCL GUVI - Full Stack Developer Intern

Nancy

Summary

Detail-oriented full stack developer specializing in JavaScript, React.js, and REST API development. Demonstrated success in creating responsive web applications that enhance user engagement through innovative UI designs. Strong problem- solving skills and ability to deliver high-quality code under tight deadlines.

Experience

GUVI IIT- Full Stack Developer Intern

Gurgaon
05/2025-03/2026

- Implemented state management and routing with ReactJS and hooks.
- Constructed REST APIs with Express.js and managed data using MongoDB and Mongoose to streamline data retrieval and manipulation.
- Developed responsive web applications using HTML, CSS, and JavaScript.
- Utilized Tailwind CSS and Bootstrap for effective UI design.
- Created animations with Framer Motion to improve user engagement and interactivity.
- Integrated Three.js to deliver immersive 3D graphics in web applications, enhancing visual appeal.
- Employed JWT for secure authentication processes.
- Leveraged ES6 features, Flexbox, and CSS Grids for modern layout techniques.

Projects

Learning Management System (LMS)

Developed a modern full-stack Learning Management System designed for students and administrators with secure JWT-based authentication, role-based access control, course management, student dashboards, progress tracking, and dynamic content handling. Implemented features such as course creation, video/content management, enrollment systems, user profile management, and responsive UI components to deliver a seamless learning experience across devices. Built scalable REST APIs using Node.js and Express.js, integrated MongoDB for efficient database management, and designed an interactive frontend using ReactJS and Tailwind CSS with optimized performance and clean user experience.

Tech Stack: ReactJS. Node.js Express.js. MongoDB. Tailwind CSS. JWT Authentication REST APIs
Firebase Git/GitHub

Kanban Board Application

Developed an interactive task management and productivity application with drag- and-drop functionality, task categorization, dynamic state updates, and responsive dashboard interface. Implemented efficient task organization workflows and modern UI interactions to enhance user productivity and experience.

Tech Stack: ReactJS JavaScript Tailwind CSS State Management

AI Career Coach Platform

Developed a full-stack AI-powered career preparation platform enabling users to practice mock interviews, analyze resumes, improve ATS scores, generate cover letters, build professional resumes, and receive personalized career roadmaps. Integrated Gemini AI for intelligent content generation, implemented JWT-based authentication, protected routes, PDF report generation, and analytics dashboards for interview performance tracking.

Tech Stack: ReactJS • Node.js • Express.js • MongoDB • Gemini AI • JWT Authentication • Tailwind CSS • REST APIs • Recharts

Luxury E-Commerce Website

Developed a premium e-commerce platform for luxury fragrance products with product collections, featured products, shopping cart, wishlist, and user authentication functionality. Designed a responsive and visually appealing user interface with modern animations, seamless navigation, and optimized user experience. Implemented dynamic product management, state handling, and reusable React components to ensure scalability and maintainability.

Tech Stack: ReactJS • JavaScript • Tailwind CSS • Framer Motion • React Router • Context API • Responsive Design
